The following is an examiner's statement of reasons for allowance

Claims 1, 2 and 4-23 are allowed because the prior art does not disclose or suggest a method or apparatus with at least one hand for indicating that the device is operating in a selected mode, wherein the method or apparatus comprises steps or means for oscillating the hand between a first position and second position, calibrating the hand so that the second position becomes a new first position, and oscillating the hand between the new first position and a new second position while the device is operating in the selected mode.

The Kamiyama et al reference disclose hand 11 oscillating between two positions 13 (Fig.2) for indicating the state of power generation, however, the movement is not repeated for each new position of the second hand 11 but appears to be limited to oscillating motion about the 12 o'clock position. (Col. 6, lines 42-46).

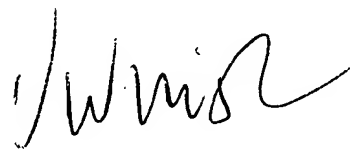

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
